Instructions for the Encumbrance and PO Management Form (EMF)

The Encumbrance and PO Management form (EMF) includes options for managing the purchase order (PO) and allows departments to close POs, and to request dollar amount and funding string changes to their POs/encumbrances. The instructions below assist in completing and submitting the form for processing.

Include the Dept. Contact Information, PO Number, and Vendor for the PO you wish to change. Be sure to check "Yes" or "No" to indicate if the PO references the listed account codes. Completing all the fields makes contacting the Dept. for any clarification and completing the changes easier.

Choose a reason to close/cancel the PO from the drop-down menus and provide an explanation in the text box. POs close on a monthly basis according to established criteria. You should not need to close completed POs using this form.

Choose 2 or 3 to make changes to the dollar amounts and/or funding on your PO. You may use these options separately or together. If changing both dollars and funding, choose a reason in both drop-down boxes. Use the text box to explain specifically which dollar amounts should be added to which funding or any other necessary information.

In the upper grid boxes list the current encumbrance balance provided in the Remaining Encumbrance Status Tool (REST). Enter your 7 digit PO number in REST and enter the information from the Total encumbrance balance for the current fiscal year grid. This is the funding and dollar amounts as they currently appear on the PO and as they are currently reflected in WISDM (not the original amounts).

In the lower grid boxes list what you would like the funding and amounts to look like on your PO after the change(s) has (have) been made. The New total will automatically be calculated.

Use the reasons provided in the drop-down menus to explain your changes and use the space provided the text boxes for further explanation of the changes. Provide as much information about the changes as possible.
Tracking the Changes:
Once completed, encumbrance management changes will appear in WISDM the following day. Most changes will also be logged as completed in the Requisition Inquiry available through http://www.bussvc.wisc.edu/purch/purchinq.html in the same manner that requisitions can be tracked. (A set of instructions detailing how to track requisitions is available at http://www.bussvc.wisc.edu/purch/req/TrackingReqs.pdf). The change will be noted in the Requisition Action Log near the bottom of the screen.

What if I Request a Funding Change After Payments Have Been Made?
Please note that if you request a change to the funding string after partial payments have been made, the PO will have to be modified in the Shared Financial System (SFS) with an 002 extension instead of the original 001 extension. In this case your PO encumbrance and expense data in WISDM will appear under both XXXXXXX001 (for the original information) and XXXXXXX002 (for information after the change) entries where XXXXXXX is the original 7 digit requisition number. Please be sure that you are looking up the data in WISDM using the 7 digit requisition number instead of the full 10 digit PO number. If this has occurred on your PO, it will be noted in Requisition Action Log (as described above in Tracking the Changes) as follows:

<table>
<thead>
<tr>
<th>Date: 5/30/2008</th>
<th>Action: ENCUMBRANCE MGMNT PO CLOSE AND COPY TO NEW &quot;-00X&quot; PO</th>
</tr>
</thead>
<tbody>
<tr>
<td>Action Date: 5/30/2008</td>
<td>Action By: AS PER BEN B</td>
</tr>
</tbody>
</table>

Note: The form will not be able to affect previous transactions, e.g. if a payment was already completed, a non-salary cost transfer (NSCT) must still be completed to transfer funds; however, the form can be used to ensure that future payments are applied correctly.

Contact your Dean or Director’s office with questions about using the form or see http://www.bussvc.wisc.edu/purch/EncMgt/EncMgt.html for further information.
